ISOLE EOLIE

Vulcano Collection

Fra le isole Eolie, Vulcano è la più vicina alla Sicilia ed è una delle più piccole. Sulla sua superficie di appena 21 chilometri quadrati, trovano spazio ben tre vulcani: un cono primordiale, Vulcanello e il cratere della Fossa. La sua natura sorprende e affascina già al primo approdo, con colori che variano dall'ocra al giallo, dal rosso al bronzo. Nonostante l'ultima eruzione risalga al 1890, l'attività vulcanica è ancora percepibile, con getti di vapore e acqua calda che insieme alle spiagge incontaminate, rendono l'isola un paradiso di benessere ed emozioni.

Of all the Aeolian Islands, Vulcano is the closest to Sicily and one of the smallest. With an area of just 21 square kilometres, it contains three volcanoes: a primordial cone, Vulcanello and the Fossa crater. On arrival, its natural splendour both surprises and fascinates, with colours ranging from ochre to yellow, from red to bronze. Despite the fact that the last eruption took place in 1890, volcanic activity is still evident with jets of steam and hot water that, together with the unspoiled beaches, make the island a paradise of well-being and sensations.
